INTRO

At Deeluxe, we share your passion. When not riding, we're working to make our time on the snow even better. By collaborating with riders to develop boots for the specific terrain they shred, we offer footwear as diverse as today's riders. These boots are driven by design and defined by comfort. And although we're committed to crafting exceptional footwear, we're just as committed to using it. With the help of our friends and team, our boots are tested around the globe on concrete, snow, and steel. After all, our efforts to push progression involve not just the technology in our boots, but also the memories they make possible.

SPARK
SUMMIT

THE BRISSE

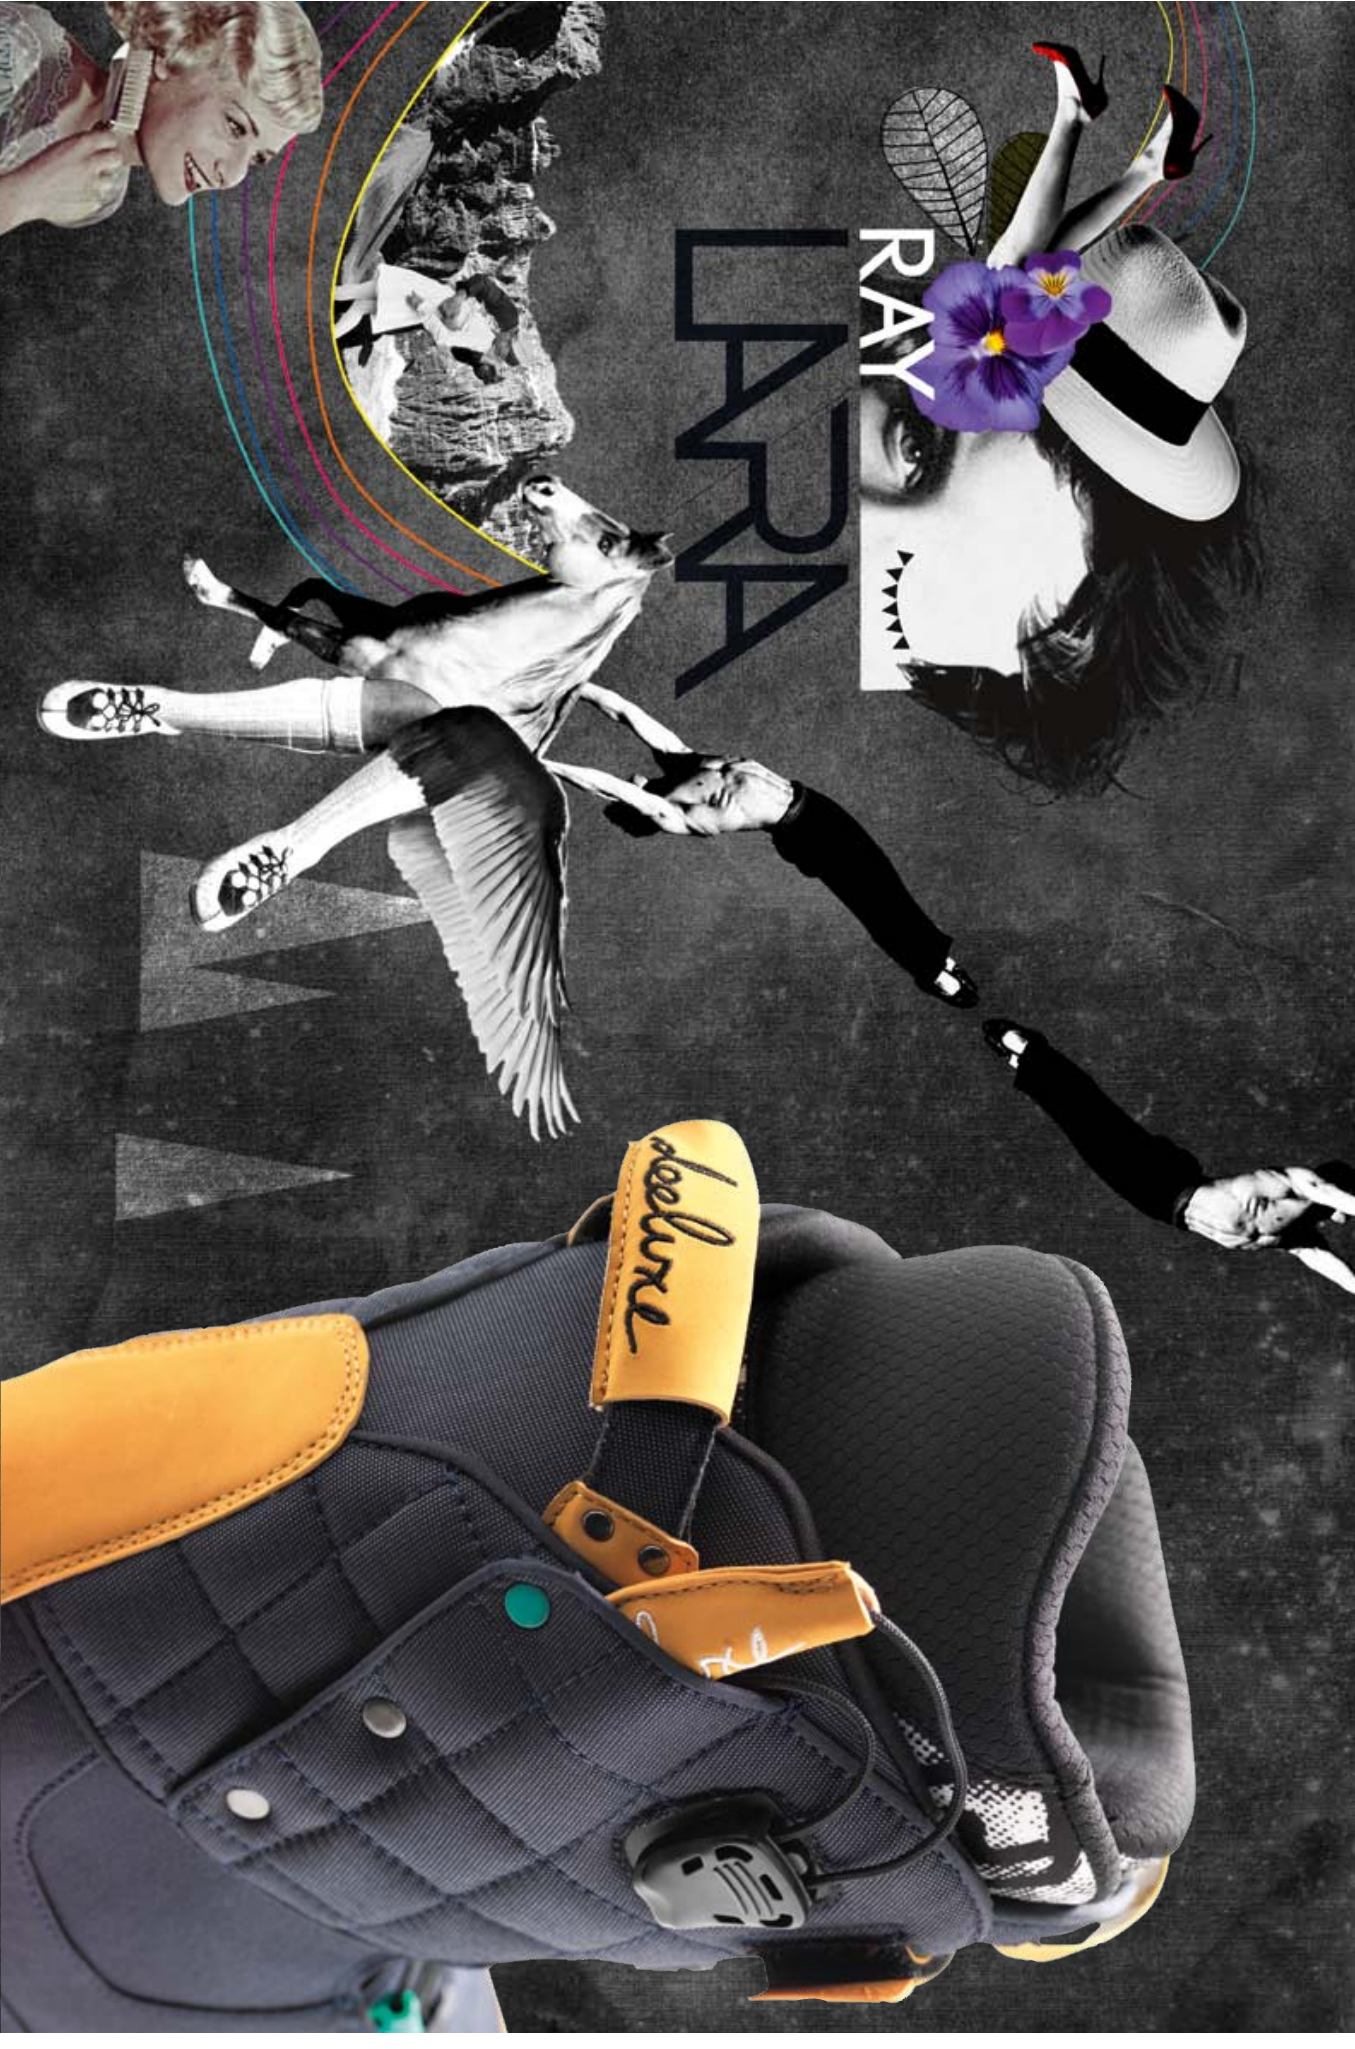

"This is the boot for all for all types of riding and terrain! It's comfortable, warm and has a medium flex so you don't spend a month breaking it in. Plus its mellow colors look sick." Dan Brisse

THE STREET

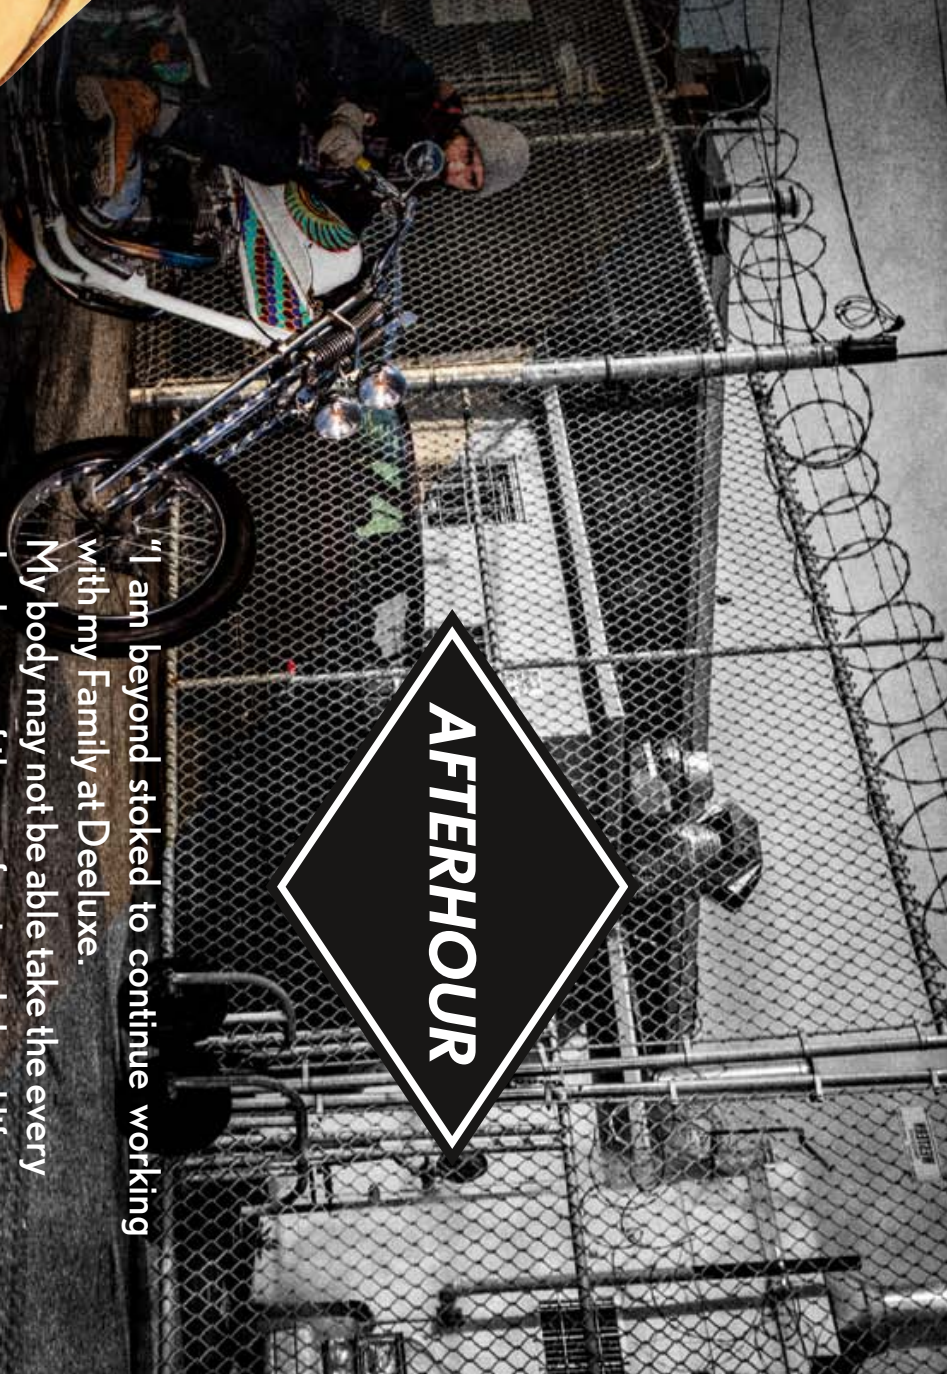

"I like how the team at Deeluxe works together with the riders and takes our feedback seriously. It feels like we did something special in making The Street function and perform just the way we want it to - the boot is light and soft and features a shorter profile. It works perfectly for jibbing and especially well with reverse camber boards. Combined with solid artwork, these features make The Street my favorite boot yet - and my number one choice for all terrain." - Sebi Müller

ID
REVERSE

AFTERHOUR

"I am beyond stoked to continue working with my Family at Deeluxe. My body may not be able take the every day bangs of the professional shred life any longer, but snowboarding will always be a huge part of my life." TJ Schneider

TECHNOLOGY

We work relentlessly to build better boots — but we can't take all of the credit. Our riders, customers, and retailers play an essential role in shaping the direction of Deeluxe. This is especially true for this year's collection, which pioneers new technology while also refining proven approaches. To maximize their fit and performance, all our boots feature different kind of constructions. Many of these models tap into new outsoles that offer both a low profile and enhanced cushioning. To provide unsurpassed luxury, we've also created a Thermo Flex Premium liner that features a leather inlay. And thanks to a new FLD, you can spend less time lacing your boots and more time shredding. As a small, independent company, we pride ourselves in crafting not just boots, but also a community. As much as our boots are made of premium ingredients, they are also made from chairlift conversations, napkin sketches, and ongoing collaborations.

NEW FLD

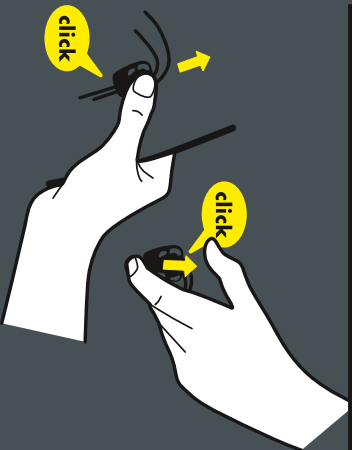

SIMPLE BUTTON

PUSH TO OPEN

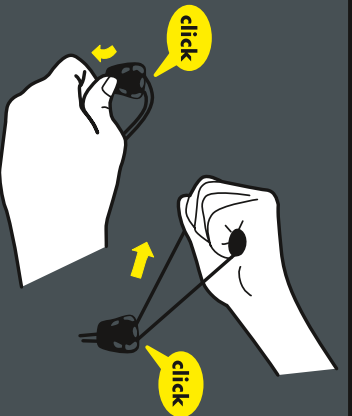

TAP TO CLOSE

We worked closely with our customers and team riders to refine the FLD system. Our new ergonomic design is especially user-friendly. Whether tightening your boots or taking them off, you'll appreciate its simplicity and efficiency. Needless to say, this new design offers the same reliable lace hold for which the FLD is known.

OPEN

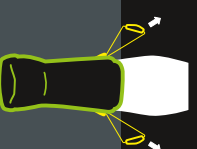

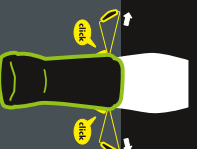

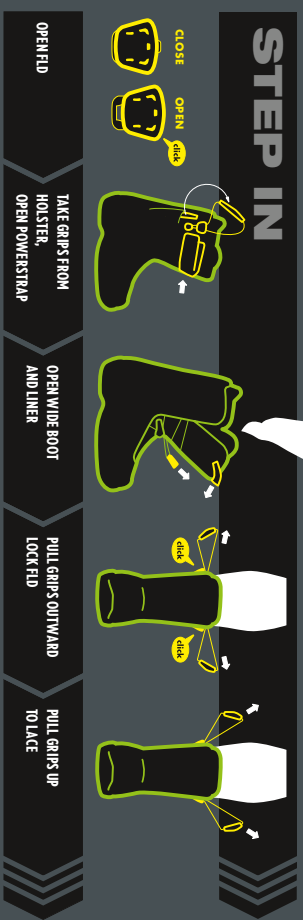

CLOSE

LACING SYSTEMS

STEP IN

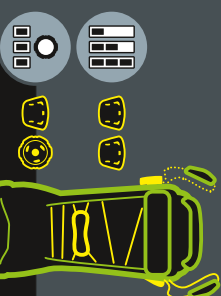

*adjust lacing as
TIGHT or LOOSE
as you like*

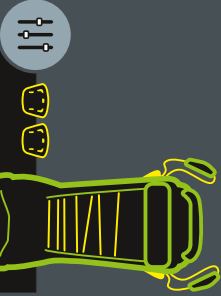

POWERSTRAP
By securing the call in place, the Powerstrap adds additional support to a boot's lacing system.

IMPORTANT
DON'T LACE TOO TIGHTLY, THIS CAN LEAD TO CRAMPS

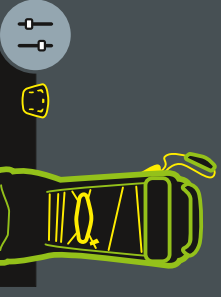

C3 LACING

To begin, open the pocket on the boot's tongue and pull on the outer yellow lace. This secures the heel. Next, close the lid and lace the forefoot to create the fit you desire. To open the boot, slide both locks up and pull the tongue away from your shin.

SECTION CONTROL LACING

The Section Control Lacing system is the most convenient and precise lacing system on the market. By using both of the handles attached to the laces, you can adjust the boot's fit in three zones - the forefoot, heel and call. You can even make these adjustments while strapped into your bindings. The US Patent 7,515,315 is a breakthrough in speed lacing.

SCL SINGLE

A single handle and lace make the SCL Single especially fast, efficient, and easy to operate. Pulling on the lace handle allows you to tighten the boot to your personal preference. Thanks to the crossing of the laces in the boot's instep area, the SCL Single provides optimal heel hold.

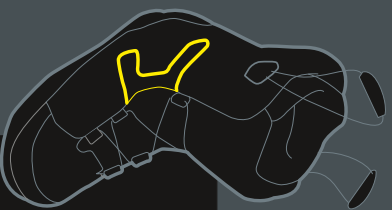

C3-CONSTRUCTION

CUSTOM FLEX

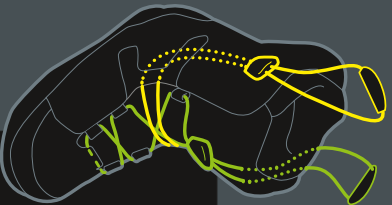

+ C3-LACING

= C3-CONSTRUCTION

CUSTOM FLEX

The name says it all – our Custom Flex construction enables riders to adjust the support and responsiveness of their boots. The ankle lacing allows you to secure your foot in the boot. Thanks to the micro-adjustment Boa® foot, these boots embody you with the perfect fit and flex.

C3-LACING

One boot – three zones. The three-part division of the boot allows the heel, forefoot, and shank zones to be isolated and laced separately. The yellow zone holds the heel and stabilizes the ankle. When this zone is laced, the boot is combat-ready and fully functional. Separate lacing systems for the forefoot and shank zones enhance comfort by providing means to adjust these specific areas. Loose lacing in the green zones yields a softer flex, while tighter lacing in these areas provides a stiffer flex.

SHELL & FLEX CONSTRUCTION

DUPONT® SURVIV HIGHBACK

This highback contributes to the durability and stability of the boot. Combined with additional reinforcement in the highback area, it's designed to add in during its stiff needs.

SYMPATEX® MEMBRANE

Environmentally friendly and recyclable, the Sympatex® membrane provides protection from the elements. The membrane is breathable, so your feet stay warm and dry.

DTEX MEMBRANE

Our proprietary waterproof and breathable membrane keeps your feet safe and dry so you can be all day.

WATERPROOF CONSTRUCTION

Precise stitching and a sandwich construction ensure we can penetrate the boot's shell. After all, a dry boot is simply best.

TPS-SHIELD

Available as an accessory, the TPS Shield strengthens a boot's tongue, providing a stiffer flex and additional support.

PERFORMANCE-RATE

FLEX-RATE

To ensure your feet find their soulmate, we've developed a system that not only rates boots on their flex, but also on their performance. This provides a more precise assessment of each boot's capabilities. As its name suggests, the flex rating indicates a boot's stiffness. The performance rating evaluates a boot's responsiveness, as well as the caliber of its technical features. Thanks to these ratings, it's especially easy to find the Deeluxe boot that best meets your needs.

ASYMMETRICAL FLEX FOR ALL MOUNTAIN RIDING

- Maximum comfort offered by the large flex area and soft reinforcement on the boot's inside.
- Complete support offered by the small flex area and stiff reinforcement on the boot's outside.
- No bulging, perfect balance, strong heel hold and flex offered by the defined hold zone in the joint area.

PRO FLEX FOR HIGH-SPEED RIDING

- This construction designed to meet the needs of freestyle who demand premium performance.
- The design provides the perfect blend of flex and stability.
- Defined flex zones in the boot's joint area offer maximum support and eliminate bulging.

EASY FLEX FOR MAXIMUM COMFORT

- This design provides maximum comfort.
- The boot's flex window prevents it from buckling and bulging.

THERMO FLEX PREMIUM

PERFECT FIT BY HEAT-FORM

LEATHER INLAY

HEEL HARNESS

We're proud to debut our Thermo Flex Premium liners. Their leather lining provides unsurpassed comfort and aids in regulating moisture. Yet equally important, these liners are designed to be heat-formed to your feet—providing a fit that is truly customized. To take full advantage of this feature, we recommend enlisting the assistance of your local Deeluxe dealer.

E-LACING

Super strong and incredibly efficient, the E-Lacing system featured in our liners keeps your feet comfortable while holding them securely.

OVEN

50130100079110 220V 52.37 x 4.5 cm
50130100079110 220V 52.37 x 4.5 cm

- Provides the perfect fit through heat-forming
- Place liner in the oven and heat to 200°C - 230° F
- While cooling, filners to feet
- The liner will remain in this form

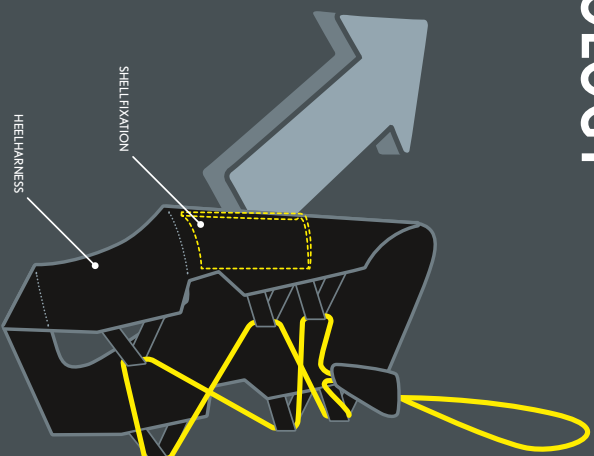

LINER TECHNOLOGY

HEEL HARNESS

The Heel Harness functions much like an ankle brace. It binds the liner, securing ankles in place and protecting them.

SHELL FIXATION

A Velcro fastener anchors the liner to the shell. This prevents the liner from slipping and offers an especially stable heelhold.

THERMO FLEX

This Liner is heat-formed to your foot. The liner is placed in a special oven and heated to 90–110° C. While cooling, the liner is fitted to your foot and will remain in this form. Consequently, we recommend you have your liners professionally molded to guarantee the perfect fit.

PERFORMANCE FLEX

This liner is designed to offer premium performance and optimal support. The high-back provides stability while special L-shaped pads anchor the heel inside the liner.

COMFORT FLEX

Plain and simple, the Comfort Flex will make your feet smile. As soon as you step into these liners, your feet will feel at home and ready to ride. This flex maximizes comfort while also firmly holding feet in place.

D-LUG

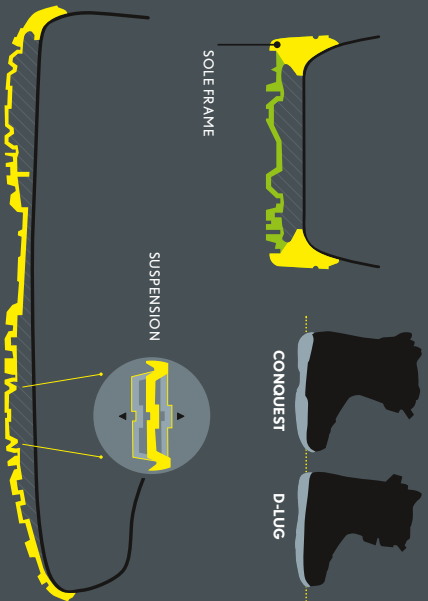

SNEAKERSTYLE
SUPER LIGHT
SUPREME CUSHIONING

Our new, patent-pending D-Lug outsole is designed to better cushion and cradle your feet. Dual impact zones provide enhanced traction and absorb vibrations. To provide additional cushioning, the sole features independent lugs that work like suspension. The new outsole also acts as a frame that enhances the support and stability of the foot.

ILS – INDEPENDENT LUG SUSPENSION

To provide an especially plush ride, we developed ILS – Independent Lug Suspension. Each lug on a boot's outsole acts like a mini-suspension system. Thanks to this enhanced cushioning, you can say goodbye to bad vibes.

OUTSOLES

TRAVERSE TRACTION

Positioned on the sides of the sole, these grip zones provide enhanced lateral hold when crossing slopes.

ANTI BRUISE CIRCLES

Located under the heel and heel, these shock-absorbing circles provide additional padding while creating a direct connection to the EVA midsole.

EVA CUSHION

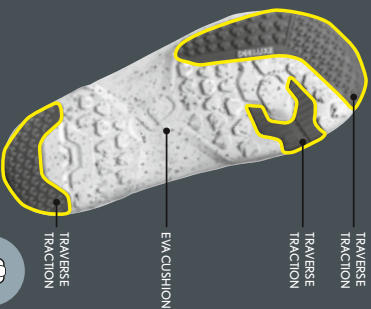

EVA is a special material that maintains its flexible properties at all temperatures. Because EVA provides optimal performance even in extreme cold, it's the material of choice for all of our boots.

GEL CUSHION

Gel cushions offer progressive force-distribution properties. These cushions protect your feet against impacts while still providing a responsive ride.

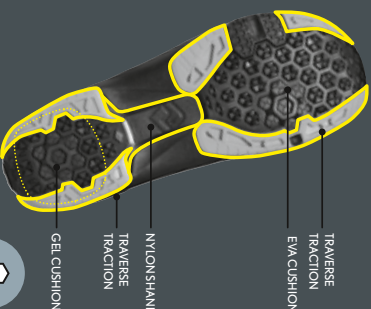

NYLON SHANK

The nylon shank stabilizes your feet, preventing torsion between your heel and forefoot.

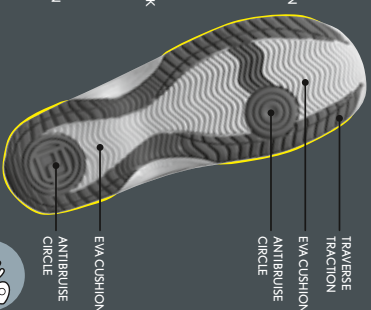

CONQUEST OUTSOLE

The Conquest Outsole is made from a special EVA mixture that provides an enhanced board feel similar to that offered by skiing or surfing. This material also offers exceptional cushioning. To enhance traction, the sole features grip zones in the heel, fore, and ball. The Conquest Outsole delivers performance without compromise.

CONWEB OUTSOLE

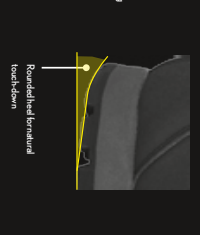

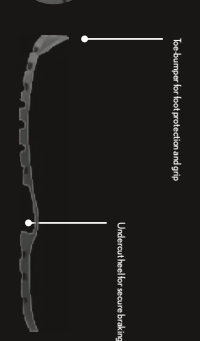

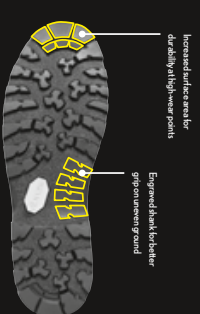

The Conweb Outsole features a multidimensional hexagonal tread. This offers a secure hold in every direction and enhances feel at the boot-board interface. An integrated nylon shank provides torsion control by translating forces throughout the sole and stabilizing it. The Conweb provides the perfect mixture of cushion, contact, and control.

FISHBONE OUTSOLE

The Fishbone Outsole blends the aesthetics of a classic sneaker ride with technical features. Despite its simple appearance, this sole offers a foot-cradling design, excellent traction, cushioned areas under the ball and arch, and minimal weight.

VIBRAM OUTSOLE

BACKCOUNTRY SERIES

WE MAKE BOOTS THAT NOT ONLY GET YOU INTO THE BACKCOUNTRY, BUT ALSO BACK HOME. WE PIONEERED THE FIRST BACKCOUNTRY AND SPLITBOARD-SPECIFIC BOOTS, AND CONTINUE TO BREAK TRAIL WITH OUR INAUGURAL BACKCOUNTRY SERIES. THE CONSTRUCTION OF THESE BOOTS ENABLES YOU TO ADJUST THEIR FIT, FLEX, AND FEEL. THEIR VIBRAM SOLES ARE BUILT FOR HIKING, SKINNING, AND RIDING, AS WELL AS ROCKING CRAMPONS, AND WITH A RANGE OF MODELS, THIS COLLECTION MEETS THE NEEDS OF ALL BACKCOUNTRY EXPLORERS. IF YOU EARN YOUR TURNS, THE LEAST WE CAN DO IS MAKE GEAR YOU CAN COUNT ON.

SPARK SUMMIT BROWN

With a leather shell and lining, these boots offer premium performance and decadent luxury. Paired with the Boa system, their C3 lacing provides the perfect fit and all-day dependability.

INSPIRATION SERIES

AS A RIDER-DRIVEN COMPANY, OUR TEAM IS OUR FOUNDATION. EVERY BOOT WE MAKE IS THE RESULT OF THE FRIENDSHIP, VISION, AND FEEDBACK OF OUR RIDERS. THIS PAST YEAR, THEY HAVE BEEN ESPECIALLY BUSY. WHETHER REFINING PROVEN CLASSICS OR DEVELOPING NEW DESIGNS, THEY NEVER CEASE TO AMAZE US. THE INSPIRATION COLLECTION SERVES AS A CHANCE TO GIVE THANKS TO THESE RIDERS AND DEVELOP BOOTS BUILT AROUND THEIR NEEDS. YET EVEN IF YOU DON'T RISK YOUR LIFE GAPPING PARKING GARAGES OR THROWING DOWN DOUBLE CORNS, YOU'LL BENEFIT FROM THESE BOOTS.

ID FICHTL BLACK / RED

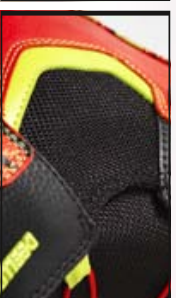

Designed by backcountry charger, Pirate, and longtime Develuxe rider Marco Feichter, the ID Fichtl turns the entire mountain into a playground. Pow addicts everywhere join Marco in endorsing this boot. Come get your freestyle fix.

FROM THE BACKCOUNTRY OF WHISTLER TO THE RAILS OF HELSINKI, FEMALES ARE AT THE FOREFRONT OF PROGRESSION. AS THE CALIBER OF THEIR RIDING INCREASES, THEY DEMAND MORE FROM THEIR GEAR. AND WITH CALVES THAT TEND TO SIT LOWER ON THEIR LEGS, FEET THAT ARE NARROWER AND SHORTER INSTEPS, WOMEN NEED MORE THAN A MAN'S BOOT WITH A MODIFIED COLORWAY. AT DEE LUXE, WE COLLABORATE WITH OUR FEMALE RIDERS TO MEET THEIR NEEDS. THEIR VISION AND FEEDBACK DRIVE THE INNOVATION THAT DEFINES THE LARA COLLECTION. WE WORK WITH OUR RIDERS TO DESIGN THESE BOOTS AROUND A FEMALE LAST. THIS ENSURES THAT OUR LINERS, SOLES, SHELLS, AND LACING SYSTEMS WORK TOGETHER TO CREATE BOOTS THAT BLEND PERFORMANCE AND COMFORT. WE ALSO INFUSE THE LARA COLLECTION WITH ADDITIONAL DETAILING AND MATERIALS TO ENSURE THE BOOTS LOOK AS GOOD AS THEY RIDE. WHETHER WOMEN ARE DROPPING CHUTES, RIDING RAILS, OR GETTING THEIR START ON THE BUNNY HILL, DEE LUXE IS THEIR PARTNER IN PROGRESSION.

CLASSIC SERIES

FIT, COMFORT, AND PERFORMANCE - SOME THINGS NEVER GO OUT OF STYLE. AND ALTHOUGH OUR CLASSIC SERIES TAPS INTO TIMELESS DESIGNS, IT'S ANYTHING BUT STATIC. THIS YEAR WE'VE INTRODUCED OUR C3 CONSTRUCTION TO THE SERIES, AS WELL AS A NEW MODEL. SHOWCASING OUR COMMITMENT TO CRAFTSMANSHIP, THESE BOOTS ARE DESIGNED TO MEET THE NEEDS OF A RANGE OF RIDERS. INSTEAD OF COMPROMISES, THESE BOOTS OFFER CREDIBILITY. FROM BEGINNERS TO BACKCOUNTRY CHARGERS, RIDERS CAN COUNT ON THE CLASSICS.

AFTERHOUR BROWN

When it's time to kick off your shred boots, slip into the Afterhour. Designed by T.J. Schneider, this minimalist leather boot offers plenty of comfort for going out on the town.

After a day of shredding, the last thing you want to do is put on another pair of rigid heavy boots or sneakers that get soaked the second you step out of the car. The Afterhour is a classic motorcycle style mid rise boot that's both functional and comfortable...soft and light water proof and comfy as a cloud.

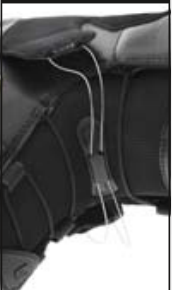

- T.J. Schneider

EMPIRE BURGUNDY

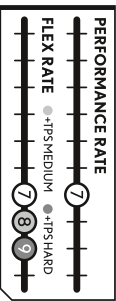

If you consider the entire mountain your domain, the Empire awaits you. With an asymmetrical flex that balances comfort and performance, the Empire is the boot of choice for all mountain chargers like Elias Elhardt.

-  DURENT'S SKI/IN HIGHBACK
-  D-TEX KNEE BAKE
-  WATERPROOF CONSTRUCTION
-  POWERSTRAP
-  SECTION CONTROL LACING
-  ASYM FLEX
-  TIPS SHIELD OPTIONAL
-  GROMMET

Refined, asymmetrical flex supports the natural movement of your feet, providing comfort with lateral and medial support

A gel cushion in the side eliminates heel rises and absorbs shock

D-Tex membrane keeps feet warm and dry

EMPIRE BLACK

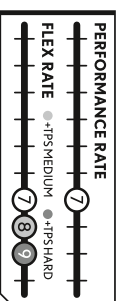

If you consider the entire mountain your domain, the Empire awaits you. With an asymmetrical flex that balances comfort and performance, the Empire is the boot of choice for all mountain chargers like Elias Elhardt.

-  DURENT'S SKI/IN HIGHBACK
-  D-TEX KNEE BAKE

-  ASYM FLEX
-  TIPS SHIELD OPTIONAL
-  GROMMET

Refined, asymmetrical flex supports the natural movement of your feet, providing comfort with lateral and medial support

A gel cushion in the side eliminates heel rises and absorbs shock

D-Tex membrane keeps feet warm and dry

ID REVERSE

In addition to being a bestseller, this freestyle fiend is the boot of choice for many of our riders. With a new toe-cap design and low profile outsole, the ID continues to push progression.

- ▶ DURANT™ SUEDE HIGHBACK
- ▶ WATERPROOF CONSTRUCTION
- ▶ POWERSTRAP
- ▶ SECTION CONTROL LACING
- ▶ PRO FLEX
- ▶ TIPS SHIELD OPTIONAL
- ▶ D-LUG

Pro flex construction creates a high performance freestyle flex

New outsole blends a low profile look with the fit and board feel of a skate shoe

From allow lines to parks, it's perfect for all mountain freestyle
